Why do we need a microgrid?

A microgrid not only provides backup for the grid in case of emergencies, but can also be used to cut costs, or connect to a local resource that is too small or unreliable for traditional grid use. A microgrid allows communities to be more energy independent and, in some cases, more environmentally friendly.

How do Elm microgrid systems work?

ELM's MicroGrid systems operate in unison with the public grid to offer energy security, cost savings and storage for commercial or industrial zones...ELM's Utility Scale MicroGrids are pre-wired, pre-tested and assembled in a UL 508 shop to ensure reliability and high quality production...

Why should you choose scale microgrids?

Microgrids can reduce energy costs while enhancing energy reliability and sustainability. That's why leading businesses, educational institutions, and other organizations trust Scale Microgrids to support their energy needs. power to grow. Our team is ready to help you take charge of your energy with solutions designed to meet your needs.

This project will allow approximately 10MW of existing PV to be connected to the microgrid currently without causing a challenge with frequency fluctuations or voltage drops in ...
