What is a Sol-Ark 15K hybrid inverter?

The Sol-Ark 15K All-In-One Hybrid Inverter combines battery charging, MPPT (Maximum Power Point Technology), grid pass through, and sell back capabilities. It's a powerful inverter. It can power an entire home with 12-15kW continuous power from batteries and solar, or it can provide up to 48kW continuous power from the grid.

How many inverters can a Sol-Ark 15K inverter run?

The Sol-Ark 15k all-in-one hybrid inverter takes up to 19.5kW from solar and outputs up to 15kW to power loads. It includes three MPPTs with two strings each and rapid shutdown capabilities. It can back up an entire home during a power outage, and it's possible to wire up to 12 inverters in parallel for commercial or industrial applications.

How much power does a 15K Solar System use?

Available power from the 15K depends on the system. A system with only batteries outputs up to 12kW continuously while a grid-tied system uses up to 48kW from the grid. When used with solar panels, the 15K can receive up to 19.5kW of solar input, using up to 15kW to power loads and 4.5kW to simultaneously charge batteries.

How many kW can a 15K power?

When used with solar panels, the 15K can receive up to 19.5kW of solar input, using up to 15kW to power loads and 4.5kW to simultaneously charge batteries. When connected to solar, the surge capacity of 24kVA is enough to start large items like well pumps or compressors, while still running home loads.

All-in-one hybrid inverter charger and powerful lithium bat cabinet. Grid tie, battery back up, net metering, load share and generator. Pre-wired bat cabinet easy to install.

Equipped with a robust 15kW hybrid inverter and 35kWh rack-mounted lithium-ion batteries, the system is
