What is Aceon energy storage?

AceOn offer one of the worlds most energy dense battery energy storage system(BESS). Using new 314Ah LFP cells we are able to offer a high capacity energy storage system with 5016kWh of battery storage in standard 20ft container. This is a 45.8% increase in energy density compared to previous 20 foot battery storage systems.

What is a 5 MWh battery?

5+MWh capacity, optimized for utility scale application, ensuring peak shaving and grid stability. Features 314Ah LFP battery cells, 20ft standard container design, high energy density, and multi-level safety. High corrosion-resistant and compliant with global environmental standards

Can I deploy multiple battery containers?

We can offer flexible deployment of multiple battery containers supporting both back-to-back and end-to-end installations. The battery container is compatible with the leading global inverter manufacturers such as SMA & Power Electronics with up-to 2.5MW of power per battery container.
