Is Huawei a 5G & AI supplier?

Amid US-China tech tensions, Huawei targets its global evolution as an AI and 5G network supplier. At the Shanghai MWC 2025 event, the company shed light on its goals related to artificial intelligence and network infrastructure. On Wednesday (the first day of Shanghai MWC 2025), Huawei revealed the company's progress in the 5G and AI segments.

What was Huawei doing at Shanghai MWC 2025?

During the Shanghai MWC 2025 event, Huawei also unveiled AI and 5G solutions. It strived to boost the global 5G-A rollout and collaboration with telecom operators to fulfill growing demands for smart network services.

Why is Huawei launching a 5g-a solution?

It strived to boost the global 5G-A rollout and collaboration with telecom operators to fulfill growing demands for smart network services. Huawei also introduced a new AI ultra-broadband solution that can help strengthen 5G network evolution for homes and businesses with end-to-end built-in computing power.

How does Huawei's 5G power work?

Huawei's 5G Power uses AI to enable communication and real-time connectivity, and the global management of grid power, energy storage, temperature control, and loads. These capabilities achieve green connectivity and computing, saving energy across three layers: modules, sites, and the network.
