This is all necessary information for determining the minimum length, width and height of the enclosure. There may be multiple ways to configure the cabinet, so consider all possible options.

Volumetric weight can be calculated by multiplying the length, width, and height of a parcel (in cm) and dividing that figure by 5000 (some carriers use a divisor of 6000/7000 and etc).

Detailed parameter table of integrated battery cabinet ... Detailed parameter table of disassembly and assembly of battery cabinet ... All products are guaranteed in accordance with relevant ...
