---

Nov 1, 2023&ensp;&#0183;&ensp;The supplementary active power control (SAPC) that is integrated into wind turbines has been widely used for improving the frequency stability of power systems with high ...

Jun 24, 2024&ensp;&#0183;&ensp;This paper proposes the development of an active control system to control the power output of a low-power horizontal-axis wind ...

Jun 11, 2024&ensp;&#0183;&ensp;ACTIVE SYSTEMS FOR WIND TURBINES In order to cool high-power electronics in wind-turbine ap-plications, an active pumped two-phase system should be considered. In a ...

Jun 5, 2020&ensp;&#0183;&ensp;The article presents furthermore a new method for the characterization of the load impact of the system and its dynamic response based on a blade-to-blade load comparison. ...

Nov 27, 2024&ensp;&#0183;&ensp;Discover techniques for active load control in wind turbines, enhancing efficiency, reducing fatigue, and improving structural integrity in varying conditions.

Nov 1, 2020&ensp;&#0183;&ensp;While the stall controlled systems rely on aerodynamic designs of the blades to control the aerodynamic torque or the rotational speed of the turbine in high wind speeds, the ...

2024, Vol. 5, Issue 2, Part A Design a grid-connected wind turbine system to feed active and reactive power to electrical load Author (s): Imad Abdul-Rida Hameed, Jabbar S Hussein and ...

Aug 1, 2024&ensp;&#0183;&ensp;Design a grid-connected wind turbine system to feed active and reactive power to electrical load August 2024 Authors: Imad Abdul

Jun 24, 2024&ensp;&#0183;&ensp;This paper proposes the development of an active control system to

control the power output of a low-power horizontal-axis wind turbine (HAWT) when operating at wind ...

Jun 23, 2025&ensp;&#0183;&ensp;Structural load suppression of wind turbines is one of the important means to improve the economic efficiency of wind farm operation. However, wind turbines are complex ...

Feb 11, 2025&ensp;&#0183;&ensp;In response to the limited power operation mode of wind farms, an active power optimization scheduling method for wind farms is proposed based on the state evaluation of ...
