Is the lithium market under pressure in Q4 2024?

While policy support and modest demand recovery in July offer some hope for price stabilization, the lithium market remains under pressure heading into the second half of 2025. In Q4 2024, the lithium market experienced a notable price decrease of \$95,495 per metric ton, Ex-Shanghai representing a decline of approximately 10.74%.

What is lithium Pricewatch?

PriceWatch is your trusted resource for tracking global lithium price trends. Our platform delivers real-time data and expert analysis, offering deep insights into the key factors driving price fluctuations in the lithium market.

Are lithium iron phosphate batteries a global benchmark?

Lithium Iron Phosphate (LFP) batteries, commonly used for energy storage systems, face supply constraints outside of China. This means that Chinese pricing will continue to set the global benchmark for at least the next two years.

How did China's spodumene crisis affect Lithium prices?

The lithium mine production increased from about 35,700 metric tons in 2023 to around 41,000 metric tons in 2024 in the Chinese region. Along with this, increased upstream spodumene output, coupled with elevated inventory levels of lithium chemicals, put downward pressure on prices in all major Asian markets.

About Lithium Lithium is a highly reactive, soft, and silvery-white metal essential for various industries, particularly in the production of rechargeable batteries for electric vehicles and ...
