-----

S& P Global reports that global lithium-ion battery annual production output surpassed 10 billion cells for the first time in 2024, the cause of both the oversupply and cost ...

With many short- to medium-term decarbonization targets accelerating investments in lithium-ion battery production capacity, S& P Global calculates demand for traction batteries to increase at ...

By bridging the gap between academic research and real-world implementation, this review underscores the critical role of lithium-ion batteries in achieving decarbonization, ...

In the past five years, over 2 000 GWh of lithium-ion battery capacity has been added worldwide, powering 40 million electric vehicles and thousands of battery storage projects. EVs accounted ...

Commissioned EV and energy storage lithium-ion battery cell production capacity by region, and associated annual investment, 2010-2022 - Chart and data by the International Energy Agency.

Global investment in EV batteries has surged eightfold since 2018 and fivefold for battery storage, rising to a total of USD 150 billion in 2023. About USD 115 billion - the lion's share - was for ...
