Apr 23, 2025 · China's energy-storage industry is facing challenges in 2025 due to the escalating US-China trade war and tariffs affecting exports to the US, its largest market.

Let's start with a jaw-dropping stat: In May 2024 alone, China exported 4GWh of energy storage lithium batteries - a staggering 664% year-on-year surge that's lighting up the ...

As this previously imported solar module inventory is depleted and suppliers fully incorporate the new tariffs into pricing, we're anticipating pricing increases for both solar ...

If energy storage were a rock band, 2023 would be its world tour year. With the global market hitting \$33 billion and generating nearly 100 gigawatt-hours annually [1], battery exports have ...

America's largest energy storage projects are powered by Chinese batteries, while European utilities beg for faster shipments. This isn't science fiction - it's today's \$200 billion ...

A customs agency navigated U.S. hazmat regulations, secured tariff reductions under renewable energy incentives, and cleared the shipment in under a week, saving the project \$200,000 in ...
