What is a solarfold on-grid container?

The solarfold on-grid container can also be expanded with various storage solutions. Each package contains a different number of Solarfold containers and the appropriate battery capacity. These combinations are not only used to optimize personal consumption, but can also be particularly valuable for energy trading on the control energy market.

What is an off-grid Solar System?

(coming soon) The Off-Grid version consists of a solarfold Container in combination with a suitable auxiliary power storage container - not hooked up to the power grid and working completely autarkically. The system provides up to 80kW of discharge power and supplies plugged-in consumers with power - even when the sun doesn't.

How many homes can a solarfold Container Supply?

The on-grid version of the solarfold container is connected directly to the public power grid and can supply up to 40single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house). The solarfold on-grid container can also be expanded with various storage solutions.

How does a solarfold storage system work?

The storage system is based on proven lithium-ion technology (LiFePO) and sophisticated electronics. The on-grid version of the solarfold container is connected directly to the public power gridand can supply up to 40 single-family homes with the energy produced (energy requirement of 3,500 kW/year/single-family house).

Key attributes working hours optional core components container house machinery test report Provided video outgoing-inspection Provided weight (kg) 300 place of origin Henan, China ...
