How many battery energy storage projects are in Australia?

Sixteen battery energy storage projects with a combined capacity of 4.13 GW / 15.37 GWh have been named as the winners of the Australian government's latest Capacity Investment Scheme tender.

What is Australia's biggest energy tender?

Australia's biggest tender delivers 15 GWh of battery energy storage systems, boosting grid reliability and advancing the 2030 renewable target.

What does CIS tender 3 mean for long-duration storage?

The outcome of the third Capacity Investment Scheme (CIS) tender highlights both the scale of ambition and the surging appetite among developers for long-duration storage. The CIS Tender 3 set out to secure 4 GW of dispatchable capacity --equivalent to 16 GWh of four-hour storage--in the National Electricity Market (NEM).

Why is Western Australia holding a separate tender?

Western Australia is holding a separate tender due to its independent energy market. All CIS Tender 3 awarded projects offer four hours of energy storage, except for Calala. Marija has years of experience in a news agency environment and writing for print and online publications.

When Troms's -30°C storage facility reduced corrosion-related failures by 81% using heated cabinet liners and vapor-deposited ceramic coatings, it proved adaptation beats reaction.
