Storing Electricity and Heat Over The Short Or Long Term Potentials and Measures For The Integration of Energy Storage Systems Target Scenarios For The Use of Energy Storage Systems in Austria 2030 A distinction in energy storage is made between the storage principle as well as short-term and long-term storage. Electrical energy can be stored mechanically (e.g. pumped storage, compressed air storage), electrochemically (classic battery), chemically (e.g. conversion of electricity into hydrogen/methane), electrically (magnetic storage) and als...
