What should a EMS Station include?

Another special space your station should include is a place for providers to exercise. Consider the specific workouts and equipment your providers are most likely to need and use. Where a firefighter might need to lift heavy weights, an EMS provider may be better served by a rowing machine, says Rodriguez.

What makes a good EMS station design?

Proper storage and easy accessibility of medical equipment are vital in EMS stations. Design solutions include modular storage systems that can be easily adjusted to accommodate different types and sizes of equipment. Achieving hygienic and sterile environments is a cornerstone of EMS station design.

What is the design and construction of a fire and emergency services station?

The design and construction of a fire and emergency services station is a long and complicated process. Many different decisions are required, and different people may be involved in those decisions. The factors governing facility design vary from department to department, and even within the organization itself.

Do EMS stations need a specific space?

Carve out specific spaces for specific uses Of course any EMS station needs adequate sleeping quarters, bathroom facilities and locker/changing rooms for both men and women - but consider what other activities happen at your station that you may not currently have a specific place for.
