Why is Brunei focusing on developing downstream energy industries?

The country is focusing on developing downstream energy industries by maximising economic spin-off potential from upstream production and assets. Brunei Darussalam aims to reduce its energy intensity by 45% in 2035 from the baseline year of 2005, in line with its regional commitment to the Asia-Pacific Economic Cooperation.

Which materials store energy based on a phase change?

Materials with phase changes effectively store energy. Solar energy is used for air-conditioning and cooking, among other things. Latent energy storage is dependent on the storage medium's phase transition. Acetate of metal or nonmetal, melting point 150-500°C, is used as a storage medium.

Which chapter should be cited in Brunei Darussalam country report 2023?

This chapter should be cited as: Ministry of Energy, Brunei Darussalam (2023), 'Brunei Darussalam Country Report', in Kimura, S., H. Phoumin, and A.J. Purwanto (eds.), Energy Outlook and Energy-Saving Potential in East Asia 2023. Jakarta: ERIA, pp.73-99 1. Background

Why is Brunei Darussalam focusing on oil & gas development?

Brunei Darussalam continues to strengthen upstream oil and gas activities to ensure long-term energy security and sustainability of oil and gas reserves. It is developing unexplored areas, such as deepwater fields. Rejuvenation of current upstream-producing assets is a priority to enhance recovery from existing fields and maximise production.

As Brunei accelerates its renewable energy transition, solar energy storage systems are emerging as game-changers. This guide explores how cutting-edge battery technology integrates with ...

This paper reviews previous work on latent heat storage and provides an insight to recent efforts to develop
