Is Busan a 'renewable' city?

As a city already producing more renewable power than it needs though, Busan currently sends the excess northwest to Seoul - Korea's capital of just over 10mn and the base for increasing numbers of AI-linked data centres and other tech industry HQs.

Does South Korea have a role in green energy?

With hundreds of stalls visited by thousands of attendees over three days, the event served both to demonstrate South Korea's own leading role in all aspects of regional green energy generation, from solar and wind - offshore and on - to nuclear, hydrogen, and more.

How will BDI affect the Busan building sector?

At present, and with much of the total in GHG emissions in the sector coming from heating units, air-conditioning and mainframes, if the BDI gets its way, the Busan building sector at least will see a 60% cut in emissions over the next five years.

How can BDI turn Busan Green?

By linking that which is possible with those who need to work to achieve it, either at the policy level, through agreeing funding or final implementation on the street, BDI plays a major role in turning Busan green.

Renewable Energy Installation Busan, South Korea, solar panels, biomass, installers. Request Any Service, Anywhere with Intently
