Does Washington have a solar tax exemption?

The exemption is available through 2029 and can exempt sales taxes for the purchase of machinery, equipment, and installation of solar energy systems. For more information, visit the Washington Department of Revenue's website. The federal government first enacted a solar investment tax credit (ITC) in 2006.

Are solar panels tax deductible in Washington?

Washington provides a sales tax exemption for solar energy systems, such as rooftop solar panels. The exemption is available through 2029 and can exempt sales taxes for the purchase of machinery, equipment, and installation of solar energy systems. For more information, visit the Washington Department of Revenue's website.

Can you get solar power in WA?

With the advent of Made-in-WA solar components and a production incentive rate paid to WA property-owners who install grid-tied solar, the numbers of homes with new solar systems in our state has skyrocketed. Click the above graphic to view larger file. You too can get clean renewable solar electricity to meet a portion of your annual energy needs.

How do I get a tax credit for a solar system?

You probably want to add your solar system to your home-owners insurance policy. Use your paid invoice to document your purchase to get your federal tax credit. Apply annually to receive your state Incentive payment. Check the system at least monthly to make sure it is working.
