Can a mobile CB be used as a base station?

Yes, a mobile CB can be used as a base station. You will need a DC power supply and a base station antenna. The power supply should have an output between 12 to 14 volts DC. The power supply must be rated at 3 amps or more. You will also need a CB base station antenna.

What should I consider when buying a portable power station?

When buying a portable power station, there are several key features to consider, including: Capacity: The capacity of a portable power station is measured in milliampere-hours (mAh). A higher capacity means the device can store more energy and provide more power to your devices. Output: The output of a portable power station is measured in watts.
