-----  
What is the Big Canberra battery project?

The Big Canberra Battery project will deliver an ecosystem of batteries across the ACT to ensure that our electricity grid remains stable. The Big Canberra Battery project includes: The large-scale battery storage system in Williamsdale will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability.

What does Williamsdale's battery storage system mean for Canberra?

The large-scale battery storage system in Williamsdale will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. This is enough energy to power one-third of Canberra for two hours during peak demand periods. Behind-the-meter batteries were installed to help power essential services across nine government sites.

Does Canberra have battery storage?

Battery storage for residential solar energy is becoming increasingly popular in Australia - including in Canberra, ACT. If you're a Canberra resident looking to install a battery storage system for your home, what are the main things that you need to consider?

How will battery storage affect Canberra's electricity grid?

Battery storage will play an increasing role in Canberra's electricity grid as we move towards electrifying our city and achieving net zero emissions by 2045. Renewable energy such as wind and solar energy make electricity that large-scale batteries can store. Batteries help support the electricity grid when the sun and wind can't.

Aug 5, 2024&nbsp;&#0183;&nbsp;&nbsp;&nbsp;A grid-scale battery project in Williamsdale has been approved, marking a significant step towards Canberra securing its energy future. The project, a joint effort between ...

Nov 11, 2025&ensp;&#0183;&ensp;The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two ...

SunContainer Innovations - Summary: Canberra's lithium battery factories are driving innovation in renewable energy storage. This article explores their role in sustainable technology, market ...

As part of the Big Canberra Battery project, the ACT Government is delivering a 250-megawatt / 500 megawatt-hour battery energy storage system (BESS) facility in Williamsdale, ACT. ...

2 days ago&ensp;&#0183;&ensp;Battery storage integration with the grid will ensure the continued growth of renewable energy in australia For technical specifications of our work on the Big Canberra ...

How will Canberra's new battery storage system work? The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. ...

2 days ago&ensp;&#0183;&ensp;Battery storage integration with the grid will ensure the continued growth of renewable energy in australia For technical ...

Explore the Williamsdale Battery Energy Storage System (BESS) project by Eku Energy, a 250MW/500MWh facility in Canberra. This project ...

Explore the Williamsdale Battery Energy Storage System (BESS) project by Eku Energy, a 250MW/500MWh facility in Canberra. This project enhances energy security and reliability, ...

1 day ago&ensp;&#0183;&ensp;The Big Canberra Battery project includes: a large-scale battery energy storage system in Williamsdale that is currently under construction behind-the-meter batteries at nine ...

Jul 23, 2024&ensp;&#0183;&ensp;Canberra's \$400m Big Battery project gets green light. Construction at Williamsdale is set to begin, aiming to power a third of Canberra.

ACES partners on ACT big battery Researchers at the ANU Centre for Energy Systems (ACES) are contributing their expertise in energy ...

ACES partners on ACT big battery Researchers at the ANU Centre for Energy Systems (ACES) are contributing their expertise in energy modelling and social research to the recently ...

Jul 23, 2024&ensp;&#0183;&ensp;Canberra's \$400m Big Battery project gets green light. Construction at Williamsdale is set to begin, aiming to power a third of ...
