What is the Big Canberra battery?

The Big Canberra Battery will play a crucial role in managing peak electricity use demand and in supporting the ACT's transition to a more sustainable energy future. For technical specifications of our work on the Big Canberra Battery, or to discuss engaging us on similarly ambitious battery storage projects, please contact our team.

What is the Big Canberra battery transformer?

This stored energy will be used to support our electricity grid. The Big Canberra battery transformer was delivered to the Williamsdale site in early September 2025. The transformer ensures electricity stored in the battery is converted to the correct voltage to be safely supplied to the grid.

Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony,plugging in profits from a big battery. ITP Renewables was engaged by EKU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system,which will begin powering one-third of Canberra households from 2025.

What are Australian companies doing about battery technology?

Australian companies and research institutions are working to develop and manufacture new battery technologies,and explore thermal energy storage,hydrogen energy storage and other technologies that promise to ofer longer duration,lower degradation,and better sustainability.

Feb 7, 2025 · Tesla has chosen an Australian coal town to build a battery service, repair and renewal facility for its vehicle, home-sized and electricity grid-scale battery products.

Feb 2, 2023 · We successfully connected the world"s first battery storage facility to the
