What is the Big Canberra battery project?

The ACT Government is committed to achieving a net zero emissions future. To reach this goal, the Big Canberra Battery project will see a network of batteries constructed across the ACT. A key project within this network is the Williamsdale Battery Energy Storage System (BESS), which will be built and operated by Eku Energy.

Will a big battery power Canberra?

The government said the big battery project will be capable of responding rapidly to network constraints and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods. The Williamsdale battery will be developed, built and operated by Macquarie Group offshoot Eku Energy.

Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony, plugging in profits from a big battery. ITP Renewables was engaged by Eku Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin powering one-third of Canberra households from 2025.

When will a solar battery be operational in Canberra?

The battery is expected to be operational in 2026 and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods.

The responses of plant photosynthesis to rapid fluctuations in environmental conditions are critical for efficient conversion of light energy. These responses are not well-seen laboratory ...

Australia's capital is stepping into the renewable energy spotlight with its ambitious Canberra energy storage
