-----  
What is an electric double layer capacitor?

An electric double layer capacitor is a capacitor that uses the electric double layer formed at the interface between the electrode and the electrolyte to store an electric charge and is characterized by its exceptionally high energy density.

What is an electric double-layer capacitor (EDLC)?

It realizes battery-less smart cards equipped with a display, and is suitable for secondary power supplies for wearable devices or IoT devices. The electric double-layer capacitor (EDLC) is made thinner with packaging technology where metal foil laminated film is used, and allowing maximum use of the space for the mountain thickness.

Are EDLC & supercapacitors in stock at digikey?

Keep an eye on your inbox for news and updates from DigiKey! Electric Double Layer Capacitors (EDLC), Supercapacitors are in stock at DigiKey. Order Now! Capacitors ship same day

Who makes film capacitors?

Faratronic (China) Faratronic is one of the world's largest film capacitor manufacturers, used widely in solar inverters and industrial power systems. Key Products: Film capacitors (AC, DC, snubber, motor run) Specialties: Power electronics, renewable energy

YAGEO-KEMET YAGEO-KEMET is one of the leading manufacturers of tantalum, polymer and film capacitors, but also offers special leakage current sensors for industry and automotive ...

1 day ago &#0183;&ensp; SuperCapacitors or Double Layer Capacitors have rapidly become recognized, not only as an excellent compromise between "electronic" or "dielectric" capacitors such as ...

# Colombian Super Double Layer Capacitor Manufacturer
