What is the Big Canberra battery project?

Installation is underway on behind-the-meter batteries at nine sites. The Big Canberra Battery project will deliver an ecosystem of batteries across the ACT to ensure that our electricity grid remains stable. The Big Canberra Battery project includes the installation of: installation of behind-the-meter batteries at nine government sites.

What is the Big Canberra battery transformer?

This stored energy will be used to support our electricity grid. The Big Canberra battery transformer was delivered to the Williamsdale site in early September 2025. The transformer ensures electricity stored in the battery is converted to the correct voltage to be safely supplied to the grid.

Will big battery power a third of Canberra households in 2025?

Canberra Times: ground breaking ceremony,plugging in profits from a big battery. ITP Renewables was engaged by EKU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system,which will begin powering one-third of Canberra households from 2025.

When will the Williamsdale battery be installed in Canberra?

The official sod turning for the 250 megawatt (MW),500 megawatt hour (MWh) Williamsdale battery in the ACT is due to be held on Friday,kicking off construction works that will see the battery in operation in 2026,with enough storage to power one third of Canberra for two hours in the evening peak.
