What is Congo LNG?

Congo LNG is a joint venture of Eni, the Congolese National Oil Co., and TotalEnergies SE. Eni SPA has launched the hull of its 2.4-million tonne/year Nguya floating LNG plant at Wison shipyard in Nantong, China. Nguya FLNG will complement the existing 600,000-tpy Tango...

Is Eni launching a floating LNG production unit for Congo?

Chinese shipbuilder Wison New Energies has launched and named the hull of Italian energy company Eni's first floating LNG production unit newbuilding for the Republic of Congo. Eni said on Saturday the 2.4-mtpa capacity Nguya FLNG unit had been floated at what is Wison's Nantong yard.

How long will Nguya FLNG take to complete Phase 2?

Nguya FLNG is 80% complete, with overall Phase 2 timing--from FLNG contract award to startup--expected to be less than 3 years. Eni says that Nguya FLNG will have a reduced carbon footprint due to its design and technology, and to its zero-flaring approach, in line with the company's decarbonization strategy.

Who is supplying natural gas for Congo LNG?

Natural gas for Congo LNG will be supplied by Eni's Marine XII 1.3-billion boe proven and probable reserves concession (65%), 20 km offshore Congo (OGJ Online, Oct. 24, 2023). Congo LNG is a joint venture of Eni, the Congolese National Oil Co., and TotalEnergies SE.
