What is a battery management system (BMS)?

This device manages a real-time control of each battery cell, communicates with external devices, manages SOC calculation, measures temperature and voltage, etc. (see key features on the right bar). The choice of BMS determines the quality and lifespan of the final battery pack.

What is a battery management software?

Battery Management Software: The BMS software is responsible for managing and controlling the various components of the BMS. It processes the data from the battery monitoring ICs, implements the battery protection and balancing algorithms, and communicates with other ECUs in the vehicle.

Why should you choose a BMS-Matrix battery pack?

The choice of BMS determines the quality and lifespan of the final battery pack. Our BMS-Matrix technology is a totally modular BMS solution, allowing you to build a very large capacity or power battery from unit "energy bricks".
