Will Cuba get more solar energy by 2030?

By 2030, the country aims to generate more than a third of its electricity from solar parks and other renewable sources. Cuba on Friday unveiled a new solar energy park in the capital Havana, part of an ambitious project to alleviate the communist island's increasingly desperate struggle with power blackouts.

Can solar power solve Cuba's energy problems?

In a nation with plentiful sunshine, Cuban officials have long had the opportunity to encourage solar power as one solution to national energy problems. But October's sweeping outages -- the island's worst power failure in years -- show little progress has been made.

Could more solar power boost Cuba's electric grid?

HAVANA (AP) -- Cuba's large-scale blackouts that left 10 million people without power this month may not have happened if the government had built out more solar power to boost its failing electric grid as promised, some experts say.

Is Cuba a good candidate for solar?

Besides the strong sunlight, there is another way that Cuba is a good candidate for solar. A significant share of its electricity comes from smaller power plants distributed around the country. Solar could be added or switched out in those locations. But it hasn't happened yet.

Dec 19, 2024 · Amidst an unprecedented energy crisis, the Cuban government has unveiled an ambitious plan aiming to produce nearly 600 MW of solar photovoltaic energy by the first half ...

Oct 15, 2024 · As part of that strategy, the use of photovoltaic solar energy has been promoted in Cuba, for which - since the beginning of 2024 - a broad investment process consisting of two ...

3 days ago · What is the scope of the Cuban solar project? The Cuban government's plan

is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 ...

Mar 8, 2025 · Cuba commissioned two solar power plants with the total capacity over 40 MW Starting from the beginning of 2025, Cuba commissioned two solar power plants (SPPs) with ...

Apr 12, 2025 · The Cuban Ministry of Energy finalized the construction of six solar power plants in March 2025, boasting a combined capacity of 130.8 MW. Each facility generates 21.8 MW and ...

May 6, 2025 · Santiago de Cuba inaugurates its first solar park connected to the national electrical grid, promising millions in savings Authorities celebrate the opening of the facility in ...
