What's new at Intersolar Europe 2025?

Munich, Germany - 7 May 2025 - Solis kicked off Intersolar Europe 2025 with two landmark product debuts that set new benchmarks in solar and storage technology: the world's largest wall-mounted hybrid inverter and Solis AI, a smart energy assistant designed to automate and optimize solar energy use for both homes and businesses.

Can robotics reshape the solar lifecycle in 2025?

Meeting ambitious renewable energy targets hinges on overcoming challenges like labor shortages, complex installations, and the need for meticulous upkeep of vast solar farms. Enter robotics and automation - transformative technologies rapidly reshaping the entire solar lifecycle in 2025.

Will rhomotion be able to build a solar power plant in 2025?

The continued rapid growth in the US solar PV and BESS manufacturing base is now unlikely, putting at risk much of the 160GWh pa BESS capacity Rhomotion has forecast to come online in 2025.

What will solar PV do in 2025?

In 2025, continued R&D investment and pairing with synergistic technologies like BESS and EVs will push solar PV's efficiency, utilisation, and economics to new heights.

This paper presents an interdisciplinary, novel approach for incorporating day-ahead solar forecast obtained using numeric models into a real-time simulation framework for low-voltage ...

This study was inspired by the idea of increasing the efficiency of solar drying and also the quality and productivity of solar-dried products. In this study, a low-cost solar cabinet dryer was ...
