Are plug in solar panels right for You?

Plug in solar panels are a game-changer when it comes to harnessing the power of the sun. With their easy installation and versatility, we can now effortlessly generate clean and renewable energy right at our fingertips.

What is plug and play solar?

Also known as "grid-tied", Plug and Play Solar products automatically match your home's utility electricity to seamlessly deliver solar power to your home. Includes a extension cord to easily chain together plug and play solar products or plug in any other outdoor electronics. 155 to 180 watts of power output.

What is plugged solar?

Subscribe to get special offers, free giveaways, and once-in-a-lifetime deals. Plugged Solar provides Solar Panels products to power homes by Solar Energy. The Solar Panels Systems include Grid-Tie Solar, Battery Backup, Solar Power Grid and Off-grid systems.

How does plug and play solar work?

Plug and Play Solar products deliver free solar power to your home's electric circuits through the power cable. Appliances in your home will consume this free electricity as if it was from your electric utility. While Plug and Play Solar products supply power to your home, your home needs less electricity from your utility.
