Does Lebanon rely on distributed power generation?

In Lebanon, there is already some reliance on distributed power generation due to the wide use of diesel generators that cover the deficit between supply and demand.

Why are diesel generators used in Lebanon?

Diesel generators are used in many countries and for different applications. The main driver for their use, however, is the lack of energy access and unreliability of supply. As in the case of Lebanon, the lack of energy access follows from a chronic under-supply of electricity that exposes the public to long hours of power outages.

What is the capacity distribution of diesel generators in Lebanon?

As mentioned above, there is no accurate data on the capacity distribution of diesel generators in Lebanon. However, data obtained from agents and dealers show that the highest concentration is in the low-capacity range below 150 KVA, with around 50% of their sales falling into this category.

Who owns the most diesel generators in Lebanon?

In terms of individual institutions, lists the capacities of the largest owners of generators in Lebanon, as shared by the interviewed agents and dealers. The power, telecom, military and security sectors are the economic sectors with the highest deployment of back-up diesel generator capacities.
