Could hidden communications equipment be found in Chinese-manufactured solar energy parts?

That has created a vulnerability that suddenly feels more real, as Reuters is reporting that experts have discovered hidden communications equipment in various Chinese-manufactured solar energy parts.

Are Chinese solar inverters hidden inside solar panels?

But the implications were massive. This was just one of several similar discoveries over the past year. According to reports from sources close to ongoing investigations, experts examining imported solar inverters and battery systems from Chinese manufacturers have quietly found more of these hidden Chinese devices embedded inside.

Why were solar power inverters disabled from China?

In November, solar power inverters in the US and elsewhere were disabled from China, highlighting the risk of foreign influence over local electricity supplies and causing concern among government officials, three people familiar with the matter said.

Are Chinese solar power inverters Rogue?

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by US experts who strip down equipment hooked up to grids to check for security issues, the two people said. Our chief editor shares analysis and picks of the week's biggest news every Saturday.
