-----  
Are reinforced concrete buildings safe during earthquakes?

Evidence found confirmed that the quality of construction materials and construction practices is far from acceptable. The economic impact of major earthquakes indicates the importance of having a spatial resilience policy in the events of an earthquake. Reinforced concrete buildings constitute a large portion of the existing building stock.

What happened to reinforced concrete structures during earthquakes?

Provided by the Springer Nature SharedIt content-sharing initiative Policies and ethics Due to large earthquakes, reinforced concrete structures were damaged or eventually demolished.

Who is Oman Cement Company?

Oman Cement Company is a company that has symbolized Oman's drive for self-reliance in core industries since 1983. It has given new strength to the construction industry, consolidated the nation's efforts for infrastructure development, and created resources to achieve self-sufficiency.

Why should you choose Oman Cement Company (OCC)?

You should choose OCC because our products meet global standards in performance and quality. Our manufacturing facility operates on a world class ISO 9001 certified quality management system and ISO 14001 for environment, reflecting OCC's enduring commitment to customer satisfaction and a stronger foundation for tomorrow.
