Will East Timor transition its energy sector?

Still, East Timor's government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants. In 2021, it announced tendering for solar parks and a feasibility study for hydropower schemes.

What is East Timor electrification masterplan 2025?

The overall objective of this project is to develop, for the Government of East Timor, the Electrification Masterplan 2025 of East Timor based on Renewables Energies. The East Timor Renewable Energy Electrification Plan consists on the thorough analysis of wind, solar and hydro resources (including wind measurement stations installation).

Is East Timor at an energy development crossroads?

Streetlights are seen at sunset in Dili, East Timor Sunday, Sept. 8, 2024. (AP Photo/Firdia Lisnawati) JAKARTA, Indonesia (AP) -- East Timor is at an energy development crossroads.

Does East Timor need a power plant?

East Timor's current power plants, which were built with large investments from the government in recent decades, can also produce far more electricity than the country demands, lowering the imperative for the country to switch systems, Heynen said. Still, East Timor's government has expressed interest in transitioning its energy sector.
