-----  
How much electricity does East Timorese use?

In 2022,its electricity consumption was 414.76 million kilowatt-hours. Imported fossil fuels are the primary source of energy for the country,but access to this energy is highly uneven. A majority of East Timorese live in rugged mountainous areas,and only 5 percent of these households are connected to the electricity grid.

Does East Timor need a national energy sector?

Since attaining full independence from Indonesia in 2002,East Timor has struggled to rebuild its war-damaged infrastructure,of which that supporting its national energy sector is key.

Does Timorese need energy diversification?

The Timorese government recognizes the need for energy diversificationand has committed to developing renewable energy sources as part of its strategy to enhance energy security,protect the environment,and improve access to electricity.
