Will East Timor transition its energy sector?

Still, East Timor's government has expressed interest in transitioning its energy sector. In 2020, it hired energy consultants to conduct a feasibility study for supplying natural gas to the three power plants. In 2021, it announced tendering for solar parks and a feasibility study for hydropower schemes.

Will East Timor's first solar power plant be built in 2026?

During his nine years as a Reuters correspondent, he has attempted to lend a global perspective to small-town issues. East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair told Reuters, helping it slash expensive diesel imports.

Will East Timor retire its diesel power plants?

East Timor plans to retire its diesel power plants in the "near-to-medium term," Ferreira said, adding that the country hopes to switch to natural gas-fired power plants and consider further renewable investments to further cut power costs.

Does East Timor have electricity?

Recovery was slow after East Timor gained formal independence in 2002. By 2015, just 60% of the population had access to electricity, according to the World Bank. Efforts to electrify the country have jumped since then, with 100% of residents having access to electricity since 2021, according to the International Renewable Energy Agency.

Its equatorial proximity, limited grid coverage, and focus on rural development make East Timor an ideal market for solar energy, particularly for off-grid electrification, rural clinics, and village ...

With the expanding introduction of renewable energy sources and advances in semiconductor and energy storage technologies, direct current (DC) distribution systems that combine renewable ...
