How to reduce charging cost for users and charging piles?

Based Eq. ,to reduce the charging cost for users and charging piles,an effective charging and discharging load scheduling strategyis implemented by setting the charging and discharging power range for energy storage charging piles during different time periods based on peak and off-peak electricity prices in a certain region.

How does the energy storage charging pile's scheduling strategy affect cost optimization?

By using the energy storage charging pile's scheduling strategy,most of the user's charging demand during peak periods is shifted to periods with flat and valley electricity prices. At an average demand of 30 % battery capacity,with 50-200 electric vehicles,the cost optimization decreased by 18.7%-26.3 % before and after optimization.

How effective is the energy storage charging pile?

The energy storage charging pile achieved energy storage benefits through charging during off-peak periods and discharging during peak periods, with benefits ranging from 699.94 to 2284.23 yuan (see Table 6), which verifies the effectiveness of the method described in this paper. Table 6.

How to plan the capacity of charging piles?

The capacity planning of charging piles is restricted by many factors. It not only needs to consider the construction investment cost, but also takes into account the charging demand, vehicle flow, charging price and the impact on the safe operation of the power grid (Bai & Feng, 2022; Campaa et al., 2021).

Enhance your AC Charging Stations setup with our premium charging piles price.When selecting an AC Charging Station manufacturer in China, consider factors such as product quality, ...

A DC Charging Pile for New Energy Electric Vehicles Weiliang Wu1 & #183; Xiping Liu1 & #183; Chaozhi Huang1 Received: 4 January 2023 / Revised: 27 March 2023 / Accepted: 2 April 2023 ...
