-----  
Why is PE investment in battery energy storage growing?

PE investment in battery energy storage systems is surging, fueled by their high return potential and growing energy transition demands. PitchBook data shows that PE investments in energy storage and infrastructure have more than doubled since 2014, reaching \$21.1 billion in 2024 alone.

Which sector has the most battery energy storage deals?

The industrial sector secured the most battery energy storage system deals, followed closely by the energy and utility sector. In the largest transaction, battery storage company NineDot Holdings Inc. raised \$225 million in a round of funding led by Manulife Investment Management Ltd., with participation from existing backer The Carlyle Group Inc.

What's going on with energy storage investment in 2024?

Private equity and venture capital investments in the battery energy storage system, energy management and energy storage sector so far in 2024 have exceeded 2023's levels and are on pace to reach one of the highest annual totals in five years.

What is Statera Energy doing in Greater Manchester?

In January, Statera Energy announced an investment in a 680MW Carrington Storage project in Greater Manchester. The project is expected to be one of Europe's largest battery energy storage systems.

Imagine having a power reserve that could keep Las Vegas' neon lights glowing for hours during outages - that's exactly what the 1.416GWh Gemini project in Nevada achieves for 400,000+ ...
