What is a solar PV residential system?

These systems typically include solar panels, an inverter to convert direct current (DC) to alternating current (AC), and sometimes a battery for energy storage. The solar PV residential systems can power your home directly, store energy for later, or send excess energy back to the grid.

What is a residential solar system?

Residential solar systems utilize photovoltaic (PV) panels to convert sunlight into electricity, powering your home with renewable energy. These systems typically include solar panels, an inverter to convert direct current (DC) to alternating current (AC), and sometimes a battery for energy storage.
