Who is Bess electrical?

Bess Electrical has been providing electrical services across Sydney and Newcastle for more than 15 years. Our team of electricians are highly trained and we value completing jobs on-time and on-budget. We service a wide range of clients including commercial, industrial and large scale/multi-building domestic.

What is a battery energy storage system (BESS)?

BESS (Battery Energy Storage System) is a technology that stores electrical energy in batteries and releases it when needed. It is widely used in power grids, commercial and industrial facilities, and even homes to improve energy efficiency, reduce costs, and enhance power reliability.

What is a Bess energy storage system?

We offer energy storage systems of 50kWh~1MWh, used for commercial and industrial applications. BESS provides a wide range of technical, economic, and environmental benefits, making it a key enabler of the transition to a cleaner, more resilient, and efficient energy system. Max. Charge/Discharge Rate The project began in Ontario, Canada in 2020.

What makes Bess products unique?

Each of our BESS products are designed to be modular, scalable, and fully integrated, with a low Mean Time to Repair (MTTR) for medium to large scale projects. They're made with readily accessible components, N+1 redundancy, and hot-swappable products, ensuring easy onsite servicing and maintenance.
