How much does a 6.6kw Solar System cost in Brisbane?

As a guide, the price for a good 6.6kW system in Brisbane is between \$5,000 - \$8,500. The table below shows prices for different system sizes in Brisbane: Many households in Brisbane will likely benefit from installing a battery with their solar panels. The table below shows average prices for solar panel and battery systems in Brisbane:

How much do solar panels cost in Brisbane?

As a guideline, the cost of solar panels in Brisbane is an average of \$5,530 for a typical 6.6kW system - after the STC rebate has been applied. You can expect to pay less for a 3kW system and more for a larger 10kW system, inclusive of solar rebates.

Are solar batteries a good investment in Brisbane?

The return on investment for solar batteries in Brisbane is currently lower than the return for solar panels. This is mainly due to the fact that the cost of solar batteries is comparatively much higher and there is no rebate available for battery storage in Queensland or federally across Australia.

Should you add a battery to a solar power system in Brisbane?

Adding a battery to a solar power system in Brisbane can help to increase savings, significantly lower bills and reduce emissions. To see the financial impact of adding a battery, we'll perform the same savings and payback calculations: A system with batteries significantly increases savings.

What is the cost of a solar battery in Brisbane? Adding a battery allows you to store your excess solar energy generated during the day for use at night, which is the key to ...
