Who is delivering a battery energy storage system in France?

China's Envision Energy has been selected by Kallista Energy to deliver a 120 MW/240 MWh battery energy storage system (BESS) in Saleux, northern France. The project represents Envision's first independent storage contract in the French market and signals its continued European expansion.

What is Envision Energy's first independent battery energy storage contract in France?

After previous triumphs in Europe, this project represents Envision Energy's first independent battery energy storage contract in France. Envision Energy will provide a minimum of a 14-year long-term maintenance (LTSA) agreement, starting construction in June 2025, ensuring ongoing presence in the area once the construction phase is complete.

Where will Envision Energy deliver a 120 MW/240 MWh battery energy storage system?

Envision Energy has signed its first independent energy storage contract in France, under which it will deliver a 120 MW/240 MWh turnkey project in Saleux for Kallista Energy. China's Envision Energy has been selected by Kallista Energy to deliver a 120 MW/240 MWh battery energy storage system (BESS) in Saleux, northern France.

How big is France's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735 MW by the end of 2022 and is forecasted to grow to 353,880 MW by 2030. France had 90 MW of capacity in 2022 and this is expected to rise to 359 MW by 2030. Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database.

Our battery storage cabinets are constructed with a modular design, providing optimal flexibility for businesses across various sectors. Our power storage cabinets also adhere to safety and ...
