Why do we need an uninterruptible power supply (UPS) system?

In data centres, traffic control centres, on sensitive production lines and in many other fields, systems for the uninterruptible power supply (UPS systems) save lives and secure data, avoid costs, ensure order, protect infrastructures, and prevent situations arising that can threaten livelihoods.

What is a static uninterruptible power supply (UPS)?

Our static uninterruptible power supply (UPS) systems comply with the VFI-SS-11 classification according to IEC 62040-3. With their robust industrial design, they support a secure consumer supply in continuous operation.

What does ups stand for?

Uninterruptible Power Supplies(UPS) Uninterruptible Power Supplies (UPS) Uninterruptible Power Supplies (UPS) Power Distribution (PDUs) Auto Transfer Switch Power Cords 10 Results Sort by: Popularity 6kVA Single-Phase On-Line Double-Conversion UPS without Battery Hardwire Input Hardwire &2x C13 Output 1.544,62 EUR 1.298,00 EUR VAT excl. 23 Solds

Why do you need an UPS system?

In the course of the reorganisation of the entire infrastructure and numerous changes on the electricity market, irregularities in the power supply are more likely to increase than decrease in the medium term; UPS systems reliably protect you against this risk.

FS UPS Power Supplies secure your critical data and protect electronic devices against power failures and sags for data Centres, SMB and branch offices. Rack and tower UPS power ...
