How does the Hamburg Green Hydrogen hub work?

The Hamburg Green Hydrogen Hub is directly connected to solar and wind power from the surrounding area via the transmission grid. In the HGHH, an electrolyser will produce hydrogen (H₂) and oxygen (O₂) from water (H₂O). This process generates 13 MW of usable heat - enough to supply up to 6,000 households.

Does Hamburg Moorburg have green hydrogen?

Hamburg Moorburg has something. Something that other sites don't have. Where coal delivered energy yesterday, in the near future, green hydrogen will be produced from renewable energy sources and therefore energy for mobility, heat, process gas or natural gas replacement.

How does hPa support alternative fuel infrastructure in Hamburg?

Together with private stakeholders, HPA takes pro-actively responsibility and supports the establishment of alternative fuel infrastructure in the port of Hamburg. Tanker Port areas are already bunker-ready in the port of Hamburg for any alternative fuel. Biofuels are locally available and being bunkered regularly.

The opening of the new hub reinforces TotalEnergies' commitment to advancing its role in Germany's energy transition, focusing on renewable power generation and storage ...

solar.club.official on August 12, 2024: "Tanzgebot X Solar Date: August 17, 2024 Location: Solar Club Terrassen Air, Reeperbahn 25, Hamburg Doors Open: 3:00 PM Experience an ...
