What is the metropolitan area of Asunción?

The metropolitan area consists of Asunción and 10 other municipalities within the Central Department. They all form part of a continuous urban area with an exclusively urban population, occupying 686 km². This area is home to 56 % of the country's urban population.

Is Asunción a major city?

Asunción has all the physical assets of a major city and, as is to be expected, varying levels of development. It has a historical district, residential neighbourhoods, commercial areas, and the typical infrastructure of a major city.

How many hydroelectric plants does Ande have?

It operates a single hydroelectric dam, Acaray, and six thermal power plants, with total installed capacity of 220 megawatts (MW). The company is also responsible for Paraguay's share of two bi-national hydroelectric facilities (see below). ANDE operates 3,400 kilometres (2,100 mi) of transmission lines and 1,080 km (670 mi) of distribution lines.

Is Asunción a green city?

Asunción was designated a green city following a process involving an extensive study and it is estimated that Asunción contains more than 750 hectares of green space, comprised of approximately 200 sites (plazas, squares, parks, viewpoints, cycle paths, linear commons, etc.).

100 massive concrete blocks, each weighing as much as 10 adult elephants, dancing to the rhythm of Paraguay's electricity demand. This isn't a sci-fi movie plot - it's the revolutionary ...

Paraguay generated 51.8 terawatt-hours of electricity in 2004, while consuming only 3.1 TWh. Almost all of the country's electricity production comes from a single facility, the bi-national Itaipu dam. Paraguay is one of
