What is a 19 inch server rack?

A 19 inch server rack is a piece of equipment designed to house and organize IT equipment, such as servers. The main benefit of this type of rack is that it helps keep the equipment cool. These racks generally have venting or openings in them to help with air circulation.

How much does a server rack cost?

A typical server rack costs around 1k to 2k. Some might think that's expensive for just manufactured metal. The same applies to rack mount cases, which cost at least 500 dollars. However, building one out of wood or other materials might not meet the necessary specifications and requirements.

What is a server rack?

Server racks are structures which are designed to house and organise networking equipment. Server rack enclosures are primarily used for holding servers, but they also house other network devices such as routers and cables. Server racks can be both freestanding or in wall mount form and are often used as a computer server rack or data rack.

What is a 19 inch rack system?

Racking systems are most commonly found in computing with the main computer or server modules being mounted for ease of use and maintenance. 19 inch systems are also very common in music and audio environments as a range of preamps, interfaces, effects boards and mixers can be found in the universal 19-inch format.
