How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. Electrical wiring and hardware: This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does solar installation cost?

On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system. What else affects solar installation costs?

How much does a monocrystalline solar panel cost?

Standard monocrystalline panels in 2025 cost around \$0.80-\$1.00 per watt, while polycrystalline panels average \$0.60-\$0.75 per watt. Though monocrystalline panels carry a higher price tag, they deliver better performance per square foot, which is ideal for small rooftops or when aiming for higher system output in limited space.
