Where can a portable power container be used?

The MOBIPOWER portable power container can be used virtually anywhere on the planet and will produce and store all the power you will need.

How much solar can a 20 foot container hold?

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

How much does an on-grid solar system cost?

On-grid systems are built to support energy needs but do not serve as your only electricity source. This means they're smaller and cost less than off-grid options. The average cost of solar panels for an on-grid, 5 kilowatt-hour (kWh) system is \$15,000-\$20,000. An off-grid system costs more than twice as much.

Which battery bank should I choose for the Instant off-grid containers?

Choose between a GEL Deep Cycle Sealed Lead Acid battery bank or a next-gen Lithium Iron bank. See below for more details and pictures. Pre-configured by RPS engineers. 370W solar panels power the Instant Off-Grid Containers. Each panel measures 69.1" x 40.9" x 1.4".

The mobile solar container price can vary depending on several factors, including the size of the system, the solar panels' efficiency, and the specific configuration required for your needs.

Solarabox Mobile Solar Container brings green energy wherever you need it. The integrated solar system delivers 400-670 kWh of energy daily. Thanks to foldable solar arrays, the container is ...
