Does Mexico have a tariff on energy exports?

Mexico, on the other hand, faces a 25% tariff on energy exports - such as its 450,000 barrels per day of crude shipments to the U.S. - unless those products meet USMCA requirements . Currently, 50% of Mexican goods and 38% of Canadian goods qualify for exemption under USMCA rules . Below is the timeline for implementing these tariffs.

Are Mexican exports subject to the ad valorem tariff?

Therefore, Mexican exports are not subject to the general 10 percent ad valorem tariff applied to all imports from other countries. However, Mexico is explicitly included in other tariff provisions targeting specific product categories, particularly under Sections 3 (d) and 3 (e) of the executive order.

Will US tariffs affect energy storage?

There have also been indications that the US administration may consider other tariff proposals impacting energy storage, such as a 10-20% universal tariff, tariffs of up to 60% across the board on Chinese-origin goods, and tariffs of 25% on Mexican and Canadian origin goods.

Why is the electricity sector vulnerable to tariffs in Mexico?

Although the electricity sector is not directly mentioned in the tariff discussions, its dependence on imported equipment, technology, and components--many of them from the United States--makes it vulnerable, affecting projects to modernize and expand Mexico's electricity infrastructure.

Mexican exports face unprecedented challenges in 2025, with the scheduled implementation of 30% tariffs on August 1st representing the most significant trade barrier Mexican exporters ...

Mexico, on the other hand, faces a 25% tariff on energy exports - such as its 450,000 barrels per day of crude shipments to the U.S. - unless those products meet USMCA requirements [9]. ...
