How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 KWh up to 15 KWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

What is Huawei smart string energy storage system?

With Huawei Smart String Energy Storage System, you can power your life by green power storage and be astonished by its admirable performance. No matter nights, rainy days or unexpected blackouts off the grid, the solar power is always at your request as a real bank. The built-in optimizer independently manages each battery module.

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5KWh to 15KWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

How many kWh can a Huawei luna2000 battery connect in parallel?

This new Huawei LUNA2000 10kWh+BMS Lithium Battery will allow up to 30kWh to be connected in parallel thanks to its 5kWh modular design in its different 5,10 and 15kWh models. - Modular Design. 5,10 and 15kWh models parallelizable up to 30kWh - 10 year warranty

Maximize your energy with the Huawei LUNA2000 10kWh Lithium Battery + BMS. It offers high efficiency and reliability for your energy needs.

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000,
