How much does a portable soldering iron cost?

At this point you've almost certainly seen one of these low-cost portable soldering irons, perhaps best exemplified by the TS100, a pocket-sized temperature controlled iron that can be had for as little as \$50 USD from the usual overseas suppliers.

What is the cheapest soldering iron?

The TS100 is probably the cheapest unit in the MDP-XP 90W extendable portable lab supply by Ralim TEK. I've heard rumors of this system's existence for a while now (years), and every time the concept has evolved a little bit.

What is GD300 soldering iron?

GD300 is an original electric soldering iron. It is a portable and easy-to-use electric soldering iron adopting the internal heating working mode with dual temperature sensor and acceleration extreme cooperate, reach the set the temperature only few seconds.
