What is a lithium-ion battery charging Safety Cabinet?

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard(TM) system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. Shop Now

How do I keep my batteries cool while charging?

Keep your batteries easily accessible while they charge in a safe and contained environment at a convenient counter height. A constant supply of fresh air pulling into the cabinet helps keep the batteries cool while charging in their contained environment.

Are power sockets safe for lithium-ion batteries?

They comply with EN 14470-1, and are intended to protect the contents from fire from the outside. This works well for chemicals, but not for lithium-ion batteries. Some manufacturers add power sockets to safety cabinets to make them suitable for charging batteries. But that doesn't make them safe for lithium-ion use.

Are flammable storage cabinets safe for lithium-ion use?

But that doesn't make them safe for lithium-ion use. A battery fire generates an intense internal blaze with extreme heat and smoke. Flammable storage cabinets are not designed to contain this. The fire breaks out, and in some cases the cabinet doors may even burst open due to pressure build-up.
