What is a battery cabinet?

A battery cabinet is a particular type of storage cabinet that reduces the risks associated with lithium-ion batteries. These innovative cabinets create a safer environment in which workplaces can charge and store their li-ion cells.

What is an example of a safety cabinet?

An example of a safety cabinet A battery safeis specifically designed to contain a battery fire inside the safe. Batteryguard battery safes feature a robust safe-like construction and heavy-duty locking mechanism. This ensures that the fire remains contained and cannot spread to the surroundings.

Are flammable storage cabinets safe for lithium-ion use?

But that doesn't make them safe for lithium-ion use. A battery fire generates an intense internal blaze with extreme heat and smoke. Flammable storage cabinets are not designed to contain this. The fire breaks out, and in some cases the cabinet doors may even burst open due to pressure build-up.

Do you need a battery safe?

More and more insurers are including the use of a battery safe that has been tested according to the VDMA 24994 requirements by ECB-S as a condition in their policy terms. For organisations working with large numbers of lithium-ion batteries, this is becoming an essential requirement to remain insured.
